

Unlock the full potential of your factory operations

Real-time intelligence to help you improve productivity and profitability from your existing assets today.

SIMPLE, SAME-DAY SETUP.

Clip-on sensors connect any machine into the cloud in minutes, with zero disruption or downtime needed.

From there, get real-time visibility and instant alerts across shifts and sites on any device. Reduce downtime, increase output with your existing team, and scale impact by layering on AI, sensors, and integrations.

WHAT WE TRACK

Downtime

OEE

Production

Predictive Maintenance

Alerts & Reports

Cycles

Energy

Condition Monitoring

Easily scale and keep a pulse on every factory with a powerful system that gets smarter with every machine added.

Reduce unplanned downtime

Catch issues early and address the biggest drivers of downtime slowing production, without waiting on shift or weekly reports.

Increase production from existing assets

Improve the efficiency and output of your factories without adding headcount or equipment.

Equip your team to win

Give your team the tools and visibility they need to act fast, perform their best, and drive results.

Unlock compounding performance over time

Build a foundation for continuous improvement with every additional machine, user, and factory added to the platform.
